AGILE SOFTWARE DEVELOPMENT METHODS AND CURRENT TRENDS

Vandana Chauhan

Research Scholar, Dept. of. Computer Science, CMJ University, Shillong, Meghalaya

ABSTRACT

Agile - denoting "the quality of being agile, readiness for motion, nimbleness, activity, dexterity in motion" - software development methods are attempting to offer an answer to the eager business community asking for lighter weight along with faster and nimbler software development processes. This is especially the case with the rapidly growing and volatile Internet software industry as well as for the emerging mobile application environment. The new agile methods have evoked substantial amount of literature and debates.
